The Original

COLOUR CODED SAFETY GLOVES

Invented by TraffiGlove

COMMON PROBLEM

It's like a car boot sale of different styles and different features.

What levels of protection do gloves offer?
What's good for which job?

Hand injury, especially involving cuts, is a major contributor to reported incidents. Downtime and publicity, costs money and resources, not to mention considerable pain and suffering for the injured.

You've been telling us how difficult it is to specify and implement a safety policy on site, and we listened.

The simplest solutions work best...read on

HELP IS AT HAND... ... AT A GLANCE KNOW WHAT **CUT PROTECTION** EACH GLOVE OFFERS.

RED CUT LEVEL 1 & 2

WARNING LOWER CUT PROTECTION

Suitable for lower cut risk tasks only, such as general product handling, warehouse and assembly line work and some low risk construction jobs. They are a good choice for visitors on site, to comply with safety regulations.

AMBER CUT LEVEL 3 & 4

BE AWARE MEDIUM CUT PROTECTION

Ideal for second fix construction, mechanical and electrical trades, steel fixing and handling materials with sharp edges. The gloves in this range are finished with a variety of coatings.

GREEN CUT LEVEL 5

SAFE TO GO HIGHER CUT PROTECTION

The best choice for higher cut risk tasks like applying cladding, demolition, steel fabrication and handling glass or sheet metal with cut edges. They also provide the highest protection necessary when dealing with unknown risks, such as in waste and recycling industries.

Here is the innovative, proven, easy to use 3 colour system designed to give your team added protection and you extra peace of mind.

At a glance you and your team will know what a particular glove is for, and if they have the right degree of protection. (You can even tell from a distance). TraffiGlove is colour coded according to EN 388 safety levels.

RED, AMBER, GREEN.
